Combi-filter 2-stage, 2-pole switch, with drawer for 1 or 2 fuse(s), connector conforms to IEC 60320-1/C14. This filter range has been developed to provide improved attenuation, mainly in the lower frequency range. It is a 2-stage filter to complement the FK single stage version.

These filters are suitable for use as interference suppressor where high asymmetric attenuation is required.

The range offers the following combinations:

- FKHD** connector + 2-pole switch + drawer for 1 fuse 5 x 20 mm
- FKID** connector + 2-pole switch + drawer for 2 fuses 5 x 20 mm

Special versions for medical applications are also available.
